

Protecting **LIFE** and **PROPERTY** since 1910

# PROTECTING THE AMERICAN DREAM

***JUST WHEN YOU  
THINK YOUR HOME  
IS SAFE...***

Disaster can strike. You might not see it or feel it, but it can happen. One second, you're safe and sound in your home. The next second, tragedy is at your door.

If you're not prepared for the most common home emergencies – ***a disastrous situation can happen.***

# THINK BEYOND BURGLARY

The most dangerous situations are always unexpected – but they're never unthinkable. That's why New York Merchant's Protective, Co., Inc. offers intelligent solutions beyond just burglar alarms.

## ASK YOURSELF THESE 4 QUESTIONS:

- Q What would happen if smoke from a fire filled your bedroom at night – the blinding cloud and noxious fumes could render you unconscious before you know it. What would you do?**
- Q Would anyone know you were in trouble if you were rendered unconscious by carbon monoxide?**
- Q What if your water heater burst while you were away from home or even asleep? How much damage would it cause before you knew what had happened?**
- Q If you or a family member fell ill and could not get to the phone, how would you get help?**

**DON'T TAKE THE RISK.** Our Life Safety devices can help defend you and your family from these frightening situations, giving you 24/7 peace of mind.

You don't need a burglar alarm to benefit from these safety features. They can be used alone or added onto your current system for a complete security solution.

### OUR SYSTEMS SAVE MORE THAN YOUR PROPERTY. THEY SAVE LIVES.

Today, burglary is only one of many dangers that affect millions of homes and businesses every year. Smoke, fire and flood are serious threats that can take your entire homes – and ruin your life.

**PLAY IT SAFE.  
PROTECT YOUR FAMILY TODAY.

## PROTECTION EVERY FAMILY MUST HAVE

**SMOKE DETECTION:** Smoke from a fire kills people more often than the fire does. It fills the room, blinds and literally chokes you to death. Electrical or battery-operated smoke detectors won't save you once you're unable to move. With a NYMPC monitored security system, our monitoring center stands watch 24/7.

**CARBON MONOXIDE:** It's a silent killer: odorless, tasteless and highly toxic. Just a few minutes can be the difference between life and death. That's why a NYMPC CO detector provides early warning of dangerous carbon monoxide levels. And if you can't react—we will. We will receive a signal from your system and send the help you need.

**GAS LEAK DETECTION:** Even the smallest leak from a stove, oven or water heater can cause a life-threatening explosion or inhalation injury. A NYMPC natural gas detector offers early warning of a potential threat to you, your family and your property.

**LOW TEMPERATURE SENSOR:** When the temperature drops below freezing in your home or business, pipes can crack or burst, costing you tens of thousands of dollars in damage. Our systems safeguards your property, triggering a signal to our monitoring center at the first signs of freezing temperatures inside your property.

**WATER/FLOOD SENSOR:** Water might not seem like a threat, but it can quickly destroy everything you have. A broken water line or water heater can cause serious structural damage, as well as an electrical fire. A NYMPC water sensor system will notify our monitoring center automatically, so we can alert you to the problem.

**PANIC ALARMS:** Hear an intruder? Use our panic alarm system to sound your alarm, which will immediately notify our monitoring center that you need help. It's faster than dialing 911, and easier.

**MEDICAL ALARM:** Feeling ill? Injured? Just a push of a button and we'll send the help you need immediately. Our 24-hour monitoring center will swiftly dispatch emergency response teams.

**PERSONAL EMERGENCY RESPONSE SYSTEM:** An extra level of protection for parents and seniors, our medical alert system sends help with the push of a button. We'll communicate over your hands-free, 2-way voice console and notify authorities. We'll also keep your medical history on-hand for emergency responders.

*Our systems save more than your property. They save lives.*
