

4 HOURS A DAY

Whatever your business's size or needs—from the simplest single-door alarms to multi-area computer controlled security systems — we will customize an effective, affordable security solution to fit your individual needs.

We can provide you with as many individual points of protection as you need. Our well-designed, functional and easy-to-use systems combine perimeter detection devices attached to windows and doors with an interior detection system consisting of motion detectors and specialized sensors. Over the course of more than nine decades, we have built a dedicated support team to keep you and your property safe and secure.

New York Merchants Protective is recognized by Underwriters Laboratories for the installation and maintenance of both local and central station security systems. We install, maintain, and monitor security systems from every manufacturer.

Our UL-listed 24/7 monitoring center is staffed by professional, courteous dispatchers with an average of ten years experience in security, and all of our dispatch staff have received extensive training. We provide customized responses to all types of emergencies, giving you peace of mind 24 hours a day. If you need service, a factory-trained expert technician will be dispatched by means of our computerized service dispatch department, ensuring the fastest response possible.

## NYMPC CUSTOM-TAILORED INSTALLATIONS.

NYMPC works with your team to co-author a requirements document, which will contain clear and specific guidelines. These guidelines will be followed 100% of the time. Our professionals can customize your installation to ensure that it is being done in accordance with all applicable federal, state and local requirements, governing bodies or organizations. As a national security provider, we actively maintain all necessary licensing requirements for the localities in which we do business — this helps avoid problems and keeps your security operations in compliance. Your NYMPC account manager will work to ensure that your security systems are installed on time and programmed to your requirements.

## NYMPC SERVES YOUR COMPANY WITH ONE POINT OF CONTACT.

NYMPC makes the most of your valuable time with a program to coordinate your security needs. There's no need to qualify a variety of service providers and manage multiple service contracts. This all-encompassing single point of contact lets you maintain real-time control over all costs and projects. Your NYMPC Account Program:

- Determines standards for fire and security protection, access control, 24-hour UL Monitoring Center and ongoing service.
- Saves you time and money! You make just one phone call to your NYMPC Program manager instead of synchronizing security with several companies.
- Maintains standards that address your local, regional and national requirements.
- It's important to note that while some providers offer a limited service based on their expertise — NYMPC can accept responsibility for all critical building functions including fire, security services and central monitoring — at every one of your locations
- Establishes system design, pricing, installation, service and billing for all of your facilities.
- Ensures that your specific building needs are met at every location — exactly when and how you want them.

## NYMPC KNOWS THAT TIME IS OF THE ESSENCE.

We understand that any security threat needs to be dealt with quickly. Our state-of-the-art NYMPC 24-hour UL Monitoring Centers employ some of the most sophisticated technology available today. We're geared to be there for you — always.

- A professional staff of trained security professionals monitor your business 24 hours a day, 365 days a year.
- Complete documentation with printed records detail all activity and report alarm conditions.
- Computer-assisted reporting assures quick, accurate identification of alarms so that no time is wasted in an emergency situation.
- Periodic testing and facility inspections keep you safe. Monitoring facilities are subjected to random inspections throughout the year by UL to ensure strict adherence to UL specifications
- Secure monitoring centers with standby power facilities provide uninterrupted service, even under the most adverse conditions.

A security threat doesn't always come from the outside. Employee theft affects morale and your bottom line. Often, just the presence of a state-of-the-art security system is enough to deter theft — word gets around fast! NYMPC Intrusion Alarm Systems offer flexible protection against internal and external theft. When your security staff can't be everywhere at once — your security system can.

- Area-controlled security enables your system to grow with you and adapt to your needs.
- Simple keypad operation and clear readout ensures ease of use.
- Point annunciators identify where the system is activated, to reduce loss and provide easy maintenance.
- Equipment is Underwriters Laboratories (UL) Listed, designed for commercial use and meets the highest industry standards.
- NYMP professionals will work with you on any local code and compliance requirements.

## A PROPERTY CRIME OCCURS EVERY

# 3.1 SECONDS

Sobering statistic isn't it? In the time it took you to read this, another crime against property occurred. Other statistics: *\*Source FBI time clock*

## BURGLARY PROTECTION, HOME SECURITY SYSTEM

- One Murder every 33.9 minutes
- One Robbery every 1.3 minutes
- One Violent Crime every 22.1 seconds
- One Crime Index Offense every 2.7 seconds
- One Forcible Rape every 5.8 minutes
- One Burglary every 15.4 seconds
- One Aggravated Assault every 34.6 seconds
- One Larceny-theft every 4.5 seconds

### THE SOLUTION: A FOUNDATION OF DEFENSE

At the core of every NYMP security system design are yard signs and window decals, perimeter protection and interior protection. Let a NYMPC's Life Safety Consultant provide you with a free security survey. Our highly-trained specialists will review your premises and recommend the best security system for your needs.

### THE TECHNOLOGY

So just how does NYMP protect my business or home from intrusion? Using state-of-the-art devices that constantly monitor the premises for intrusion, such as door contacts at entry points and interior monitoring with motion detectors:
